

Notes on Forex requisition problem

URL=jdbc:sqlserver://10.10.33.40:1455;databaseName=fras;encrypt=true;trustServerCertificate=true;

```
# spring.datasource.mssql.url=jdbc:sqlserver://10.10.33.40:1455;  
databaseName=fras;trustServerCertificate=true  
# spring.datasource.mssql.username=FraSa  
# spring.datasource.mssql.password=FraS@AIB1
```

**Supervisor assigns CSO but CSO and Supervisor does not get it.
supervisor does not get at accepted cards and and Cso does not get from pending cards**

Problem duplicate at card_topup table.

Solution

Delete one select * from [user] where first_name like '%assigner name %'

select * from card_topup where assigner_id = 50251 order by accepted_date desc;

select * from customer where first_name like '% customer name %'

select * from card_form where customer_id = Customer Id;

select * from [user] where id = 50514

select * from card_topup where card_id = Card Id

delete from card_topup where id = id ;
